David A. Hecht, MD

Scottsdale, Arizona

ASK DR. HECHT

FROM WHAT VANTAGE POINT DO YOU APPROACH PATIENT CARE?

Each patient's distinct needs, preferences and considerations are valued, and then time-tested surgical and nonsurgical procedures are performed, offering the best possible result for that individual.

WHAT IS YOUR GOAL FOR EACH PATIENT YOU TREAT?

Tailoring treatment to each patient's anatomy and goals, I strive to create an un-operated look. While maximizing the aesthetic outcome, my approach involves preserving or enhancing function

IN WHAT WAYS ARE YOU ACTIVE IN THE COMMUNITY?

Face to Face, a program that helps victims of domestic violence and those afflicted by physical deformities, is close to my heart. I enjoy providing them with my surgical skills. An avid runner, I also support local charities when fun runs are sponsored. Additionally, I was selected as one of "The Best Doctors in America" for 2011-2012 and my peers have recognized me multiple times as a "Top Doctor" in Phoenix Magazine.

WHAT TECHNIQUES DO YOU USE **TO REJUVENATE THE FACE?**

Patients' needs dictate my techniques and the customized approach I take with facelifts. Once I see looseness in the lower face and neck, the only reliable way to tighten it is with a facelift. In the mid-face, fillers like Radiesse and Juvéderm reliably restore youthful volume and the forehead can be beautifully refreshed with Botox or a browlift.

A natural-looking nose

The importance of extensive rhinoplasty surgery experience cannot be stressed enough when selecting a surgeon. "A poorly performed rhinoplasty can have a negative functional, as well as cosmetic, outcome and this is one of the reasons rhinoplasty has a relatively high revision rate," Dr. Hecht says. "Also, the nose is not as forgiving as other parts of the body. Its rigid cartilage and bone do not mold over time, so imperfections can actually become more prominent versus soft tissue and scarring, which have the capability to improve over time." Additionally, many patients do not realize how big a role their skin plays in the outcome of a rhinoplasty. While thin skin typically shows changes more dramatically, thick skin is better at hiding imperfections. "The parameters of each individual's skin must be taken into account when planning the surgery," says Dr. Hecht.

MEDICAL DEGREE New York University School of Medicine

LOCATION Scottsdale, Arizona

Unhappy with her tired look and inability to see her eye makeup, this 49-year-old patient sought Dr. Hecht's recommendation on how to achieve a more rested, youthful look. After undergoing an upper blepharoplasty surgery in our office to remove excess eyelid skin, the patient's eyes appear brighter and rested," says Dr. Hecht. "Within 10 days she was able to apply eye makeup."

BOUT DR. HECHT

HY DID YOU BECOME A FACIAL LASTIC SURGEON?

am a perfectionist, so I picked a field where at attribute is appreciated.

HY DID YOU CHOOSE TO FOCUS N THE FACE?

enjoy the challenge and intricacy of enhancing acial features, and it's my specialty. My double oard certification and training focus exclusively n the face and neck.

HOW HAS WORD OF MOUTH SERVED YOUR PRACTICE?

Patients often refer their family and friends based on the great experiences they have here, but I'm most humbled when other physicians refer not only their patients but their friends and family members. That level of professional respect tells me that I'm doing something right.
